

The Digital Karl Barth Library

In association with the Theologischer Verlag Zürich (TVZ) and Princeton Theological Seminary, Alexander Street Press is pleased to announce *The Digital Karl Barth Library*. This online collection will support a new generation of research into the works of one of the twentieth century's most influential theologians.

CONTENT

The collection features the entire corpus of Barth's *Gesamtausgabe*. Published under the TVZ imprint, this definitive edition of Barth's works in German currently comprises forty-two volumes of theological writings, lectures, letters, sermons, and interviews. As additional print volumes of the *Gesamtausgabe* become available, they will be added to Alexander Street's *The Digital Karl Barth Library*. Also included is Barth's *magnum opus*, the fourteen-volume *Kirchliche Dogmatik*, both in the original language and with the definitive English translation. Translations of numerous other important works by Barth are also included.

The combination of comprehensive German-language content and scholarly English translations of major works—all available in a coherent, easy-to-access online collection—make *The Digital Karl Barth Library* an unparalleled resource for students and scholars studying the life and thought of this modern-day "church father."

A POWERFUL RESEARCH TOOL

Every document in *The Digital Karl Barth Library* is hand keyed and features metadata tagging specifically designed to meet the research needs of scholars. The same dedication to scholarly research has guided the development of Alexander Street's search and presentation platform, which lets scholars perform highly sophisticated searches and view, organize, and analyze results with extraordinary speed and precision. For example, researchers can return comprehensive, accurate results in seconds for the following kinds of queries:

- Find all references to suffering and tribulation in Barth's sermons.
- In Barth's exegetical writings, identify words that occur most frequently in close proximity with the keyword *λογος* (logos).
- Locate instances where Barth mentions Hitler in his letters.
- Searching all Barth's works, find all citations of Romans, chapter one.
